Notice of Expiration of Patents Due to Failure to Pay Maintenance Fees

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th, or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

Revision of Patent Application Filing Practices

Agency: Patent And Trademark Office, Commerce
Action: Final Rule
Summary: The Patent and Trademark Office (Office) is amending the rules of practice in patent cases, Part I of Title 37, Code of Federal Regulations, to clarify requirements in the filing of patent applications and to provide for procedures to cure certain defects in the filing of applications.
Effective Date: Jan. 16, 1990.
For Further Information Contact: J. Michael Thesz by telephone at (703) 557-8384 or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.
Supplementary Information: Proposed rulemaking requesting comments was published on Nov. 30, 1988 in the *Federal Register* at 53 FR 48402-48421 and on Dec. 13, 1988, in the *Official Gazette* at 1097 O.G. 16-35 regarding adjusting patent and trademark fee amounts and including proposed changes to the rules involved in this rulemaking. The period for receiving comments on the rules involved in this rulemaking was extended by a notice published on Feb. 15, 1989 in the *Federal Register* at 54 FR 6936. The final rules adjusting patent and trademark fee amounts were published Feb. 15, 1989 in the *Federal Register* at 54 FR 6893-6910 and on March 7, 1989 in the *Official Gazette* at 1100 O.G. 7-25.

Comments on the rules involved in this rulemaking were received from two patent law associations and from three individuals. The comments received relating to particular sections and replies thereto are listed below.

Comments Related to Section 1.53

Comment: One comment suggested that it would be helpful to new practitioners, in particular, if section 1.53 was amended to specify that continuation and divisional applications may be filed under section 1.53.

Reply: The suggestion in the comment has been adopted. Language has been added to paragraph (b) of section 1.53 to specify what types of applications may be filed under sections 1.53, 1.60 and 1.62. Also, the information about filing continuation and divisional applications from paragraph (a) of section 1.60 has been placed in paragraph (b) of that section to clarify that the information applies only to applications filed under section 1.60.

Comment: One comment stated support for the proposed petition for correcting a failure to name the inventors of an application on filing but suggested that the rule should be "liberalized to indicate that the inventors do *not* need to be named at the time the application is filed, but may be named later when filing the declaration or oath." Another comment expressed no opposition for requiring a petition and fee for late submission of the names of the inventors but argued that a filing date should be granted regardless thereof since 35 U.S.C. 111 provides for a filing date upon submission of a specification and drawing.

Reply: This suggested modification to the rule has not been adopted. The suggested modification was not proposed for comment. Further, United States patent practice has long required naming all the inventors on filing. The petition procedure of the rule as amended provides adequate relief where the inventors are not named on filing through administrative oversight, for example. It is not appropriate, however, to adopt a procedure where applications could routinely be filed without naming the inventors since this would delay the processing of the applications and since the name of the inventor is often required to provide a unique identifier for an application. The name of the inventor is not only used by attorneys to identify an application but is used to locate an application within the Office, for example, when the serial number is unknown. To delay the date when the inventors are named would unduly add to the administrative burden of the Office.

Comment: One comment stated that the proposed requirement for satisfactorily explaining the delay in supplying the inventors' names was improper since 35 U.S.C. 111 uses the language "within such period and under such conditions" as may be prescribed by the Commissioner. The comment stated that "satisfactorily" implies other and unknown standards, which are not specified conditions although requiring the petitioner to explain the delay is a condition.

Reply: The comment has been adopted in that the language of the final rule does not use "satisfactorily". The final rule requires that the petition set forth the reasons the delay in supplying the names of the inventors should be excused. It is appropriate to require reasons since there may be reasons when such a petition would not be granted, e.g., where the sole reason given that the names of the inventors were not supplied was to purposely delay the processing of the application.

Comments Related to Section 1.60

Comment: One comment questioned whether under section 1.60 there is need for a petition satisfactorily explaining the delays in filing the true copy of the application or a statement that it is a true copy or whether these items should be permitted to be filed without explanation as in the case of an oath submitted after the filing date of an application under section 1.53.

Reply: The filing of an oath later than the filing date of an application, with the payment of a surcharge, under section 1.53 is expressly permitted by 35 U.S.C. 111. No such provision exists for applications filed under section 1.60. Further, it is not appropriate to encourage, in any way, the delay in processing and examining applications filed under section 1.60. The requirement for a petition with a satisfactory explanation of the delay, e.g., that the copy was omitted through inadvertence rather than for purposes of delaying the application, is considered to be appropriate.

Commment Related to Section 1.60 and 1.62

Comment: One comment supported the provisions of proposed sections 1.60 and 1.62 for excusing 1) the failure to file a true copy of the prior application or the statement that the papers are a true copy (in section 1.60) or 2) the error of filing a copy of the prior application or a new specification (in section 1.62). The comment, however, stated a belief that applicants should have the option of proceeding under either of these proposed rules or under section 1.53 to obtain as the filing date the original date of receipt of the continuing application papers, if desired.

Reply: It is already possible for an applicant to petition under 37 CFR 1.182 to have an application filed under sections 1.60 and 1.62 converted to an application under section 1.53. These different types of applications have different requirements, are reviewed by different personnel within the Office, and are processed in different manners. Conversion from a section 1.60 or 1.62 application to a section 1.53 application involves an administrative burden to the Office. Sections 1.60 and 1.62 as amended provide specific procedures so that applicants can correct the mentioned errors. These procedures should provide the remedy desired by applicants in all but very unusual situations. It is not necessary or appropriate to try to address these very unusual situations in this rulemaking.

Comments Related to Section 1.62

Comment: One comment suggested that Section 1.62(e) should refer to an amendment to the prior application as it exists "at the time of filing of the application under this section" rather than the time of filing the prior application.

Reply: The language suggested in the comment has been adopted.

Comment: One comment questioned whether a petition and fee or denial of filing date were necessary where a copy of a specification from the prior application or a new specification is improperly filed with an application under section 1.62. The comment suggested that a clerk could simply disregard the copy or the specification and place it somewhere in the file with some sort of notation that it is not accepted.

Reply: Changes to the prior application when filing under section 1.62 must be made by amendment to the prior application as it exists at the time of filing the section 1.62 application since the papers from the prior application including the specification are used to constitute the file wrapper continuing application under 37 CFR 1.62. Experience has shown that, when a copy of a specification or a new specification is filed with a section 1.62 application , a different type of application may have actually been desired. For example, a continuing application under section 1.60 may have been desired with the prior application not being expressly abandoned as occurs under section 1.62(g). Also, in the case of a continuation-in-part application, presumably the new disclosure would be contained in the specification erroneously filed with the section 1.62 application. Thus, it is not appropriate to just disregard the copy or the new specification filed with the section 1.62 application. To do so in the first example would result in an unwanted express abandonment. To do so in the second example would disregard the new invention disclosed in the erroneously filed specification. This would raise the possibility of a statutory bar under 35 U.S.C. 102(b) arising if, for example, the new invention was placed on sale in expectation that a filing date would be accorded to the application including the new disclosure. The course of action adopted is to stop the processing of the application as soon as the error is detected, to notify applicant of the error and to give applicant an opportunity to correct the error in whatever way was intended through the filing of a petition and fee.

Comment: One comment questioned whether an amendment, and not a petition, cancelling an improperly submitted copy of a specification filed with a request for a section 1.62 application would be appropriate to obtain a filing date as of the original date of filing the continuing application papers.

Reply: Paragraph (j) of section 1.62 does provide for correction of the filing error, e.g., by amendment cancelling the copy of the prior application, without the filing of a petition and fee

VOL 1109 ISS 1 DEC 5 1989 UMI

provided the correction is made before the payment of the issue fee, abandonment of or termination of proceedings on the prior application. In such a case, the filing date will be the date of receipt of the correction. However, if the date of deposit is necessary or desired as the filing date, a petition and fee are required. This is appropriate in view of the extra Office handling and processing which is necessitated by applicant's error on filing.

Comment: One comment stated that proposed paragraphs (e) and (j) of section 1.62, when read together, seemed to indicate that a filing date would be granted as of the date the filing error was corrected and not as of the date of deposit of the application. It was suggested that paragraph (e) should expressly state that once the specification is cancelled, the application will be accorded a filing date as of the date of filing of the request for the section 1.62 application.

Reply: The suggestion in the comment has been adopted. Language has been added to section 1.62(e) to state that a filing date "as of the date of deposit of the request for an application under this section" may be granted if an appropriate petition is filed.

Discussion of Specific Rules

Section 1.17, paragraph (i)(1), is amended to include reference to the petitions set forth in sections 1.53, 1.60 and 1.62 by this rulemaking.

Section 1.21, as amended, adds a new paragraph (n) setting forth the fee for handling incomplete or improper applications under sections 1.53(c), 1.60 and 1.62.

Section 1.53, paragraph (b), is amended to establish a procedure whereby the failure to name all the inventors on filing an application, which results in a filing date not being accorded to the application, can be excused upon the filing of a petition which sets forth reasons sufficient to show that the delay in supplying the names should be excused. If the petition is granted, the application would be accorded a filing date as of the date the original papers were deposited. No specific provision allowing this relief was previously in the rules. Paragraph (b) is also amended to specify that a continuation or divisional application (filed under the conditions specified in 35 U.S.C. 120 or 121 and section 1.78(a)) may be filed under sections 1.53, 1.60 and 1.62, that a continuation-in-part application may be filed under sections 1.53 or 1.62 and that the requirements for obtaining a filing date set forth in paragraph (b) apply to applications filed under section 1.53. Paragraph (c), as amended, sets forth the procedure which the Office uses to notify an applicant that the names of the inventors have been omitted and refers to the handling fee set in section 1.21(n), rather than including the fee amount in the rule. This practice is consistent with the other rules which refer to fees.

Section 1.55, paragraph (a), is amended to clarify the language of the rule by adding "an" before "interference".

Section 1.60 is amended to remove and reserve paragraph (a) and to amend paragraph (b) to include the information presently in paragraph (a) so as to clarify that the information applies only to applications filed under this section. Paragraph (b) is also amended to require that an applicant, who desires to file an application under the rule, indicate that the application is being filed pursuant to the rule. Applications which are not specifically designated as being filed under section 1.60 are considered as having been filed under section 1.53, which does not require an originally executed declaration before a filing date is given. The amendment also establishes a procedure whereby the failure to file a true copy of the prior application or the statement that the papers are a true copy, which results in a filing date not being accorded the application, can be excused upon the filing of a petition satisfactorily explaining the delay in filing these items. If the petition is granted, the application would be accorded a filing date as of the date of deposit of the request for a section 1.60 application. No specific provision allowing this relief was previously in the rules. Paragraph (c) is added to set forth the procedure which the Office uses to notify an applicant that an application filed under paragraph (b) is incomplete and the handling fee which is deducted from the amount refunded if an application is not completed after notice to do so has been given.

Section 1.62, paragraph (e), is amended to specifically state that changes to the prior application must be made by an amendment to the prior application filed in the application under section 1.62. An application which includes a copy of the prior application or a new specification is improper under the rule and is not accorded the date of deposit as the filing date unless a petition is filed and granted. This specific statement will hopefully eliminate errors by applicants. The paragraph establishes a procedure whereby such an error can be excused upon the filing of a petition with instructions to cancel the copy or specification. If the petition is granted, the application will be accorded a filing date as of the date of deposit of the request for a section 1.62 application. Paragraph (j) sets forth the procedure which the Office uses to notify the applicant that an application filed under the section is improper and the handling fee which is deducted from the amount refunded if an application is not corrected after notice to do so has been given.

Section 1.96 is amended to indicate that a copy of the microfiche appendix with computer program listings in an application is a part of the file wrapper and contents available for purchase after a patent based on the application is granted or the application is otherwise made publicly available.

Other Considerations

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. Sections 3501 et seq. This rule involves information collection requirements subject to the Paperwork Reduction Act and approved by the Office of Management and Budget under Control No. 0651-0011.

The Office has determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L 96-354).

The Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For the reasons given in the preamble and pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6 and 41, and Public Law 97-247, the Office is amending Title 37 of Code of Federal Regulations as set forth below.

3. Section 1.21 is amended by adding paragraph (n) to read as follows:

§ 1.21 Miscellaneous fees and charges.

* * * * *

(n) For handling an incomplete or improper application under § 1.53(c), § 1.60 or § 1.62 ..... $20.00.

4. Section 1.53 is amended by revising paragraphs (b) and (c) to read as follows:

§ 1.53 Serial number, filing date and completion of application.

* * * * *

(b) The filing date of an application for patent filed under this section is the date on which: (1) a specification containing a description pursuant to § 1.71 and at least one claim pursuant to § 1.75; and (2) any drawing required by § 1.81(a), are filed in the Patent and Trademark Office in the name of the actual inventor or inventors as required by § 1.41. No new matter may be introduced into an application after its filing date (§ 1.118). If all the names of the actual inventor or inventors are not supplied when the specification and any required drawing are filed, the application will not be given a filing date earlier than the date upon which the names are supplied unless a petition with the fee set forth in § 1.17(i)(1) is filed which sets forth the reasons the delay in supplying the names should be excused. A continuation or divisional application (filed under the conditions specified in 35 U.S.C. 120 or 121 and § 1.78(a)) may be filed pursuant to this section, § 1.60 or § 1.62. A continuation-in-part application may be filed pursuant ot this section or § 1.62.

(c) If any application is filed without the specification, drawing or name, or names, of the actual inventor or inventors required by paragraph (b) of this section, applicant will be so notified and given a time period within which to submit the omitted specification, drawing, name, or names, of the actual inventor, or inventors, in order to obtain a filing date as of the date of filing of such submission. A copy of the "Notice of Incomplete Application" form notifying the applicant should accompany any response thereto submitted to the Office. If the omission is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less the handling fee set forth in § 1.21(n).

* * * * *

5. Section 1.55 is amended by revising paragraph (a) to read as follows:

§ 1.55 Claim for foreign priority.

(a) An applicant may claim the benefit of the filing date of a prior foreign application under the conditions specified in 35 U.S.C. 119 and 172. The claim to priority need be in no special form and may be made by the attorney or agent if the foreign application is referred to in the oath or declaration as required by § 1.63. The claim for priority and the certified copy of the foreign application specified in the second paragraph of 35 U.S.C. 119 must be filed in the case of an interference (§ 1.630); when necessary to overcome the date of a reference relied upon by the examiner; or when specifically required by the examiner; and in all other cases they must be filed not later than the date the issue fee is paid. If the papers filed are not in the English language, a translation need not be filed except in the three particular instances specified in the preceding sentence, in which event a sworn translation or a translation certified as accurate by a sworn or official translator must be filed. If the priority papers are submitted after the date the issue fee is paid, they must be accompanied by a petition requesting their entry and the fee set forth in § 1.17(i)(1).

* * * * *

6. Section 1.60 is amended by removing and reserving paragraph (a) and revising paragraph (b) and adding new paragraph (c) to read as follows:

§ 1.60 Contunuation or divisional application for invention disclosed in a prior application.

(a) [RESERVED]

(b) An applicant may omit signing of the oath or declaration in a continuation or divisional application (filed under the conditions specified in 35 U.S.C. 120 or 121 and § 1.78(a)) if (1) the prior application was a complete application as set forth in § 1.51(a), (2)applicant indicates that the application is being filed pursuant to this section and files a true copy of the prior complete application as filed including the specification (including claims), drawings, oath or declaration showing the signature or an indication it was signed, and any amendments referred to in the oath or declaration filed to complete the prior application, (3) the inventors named in the continuation or divisional application are the same or less than all the inventors named in the prior application, and (4) the application is filed before the patenting or abandonment of or termination of proceedings on the prior application. The copy of the prior application must be accompanied by a statement that the application papers filed are a true copy of the prior application and that no amendments referred to in the oath or declaration filed to complete the prior application introduced new matter therein. Such statement must be by the applicant or applicant's attorney or agent and must be a verified statement if made by a person not registered to practice before the Patent and Trademark Office. Only amendments reducing the number of claims or adding a reference to the prior application (§ 1.78(a)) will be entered before calculating the filing fee and granting the filing date. If the continuation or divisional application is filed by less than all the inventors named in the prior application, a statement must accompany the application when filed requesting deletion of the names of the person or persons who are not inventors of the invention being claimed in the continuation or divisional application. If a true copy of the prior application as filed is not filed with the application or if the statement that the application papers are a true copy is omitted, the application will not be given a filing date earlier than the date upon which the copy and statement are filed, unless a petition with the fee set forth in § 1.17(i)(1) is filed which satisfactorily explains the delay in filing these items.

(c) If an application filed pursuant to paragraph (b) of this section is incomplete, applicant will be notified and given a time period within which to complete the application in order to obtain a filing date as of the date of filing the omitted item provided the omitted item is filed before the patenting or abandonment of or termination of proceedings on the prior application. If the omission is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less the handling fee set forth in § 1.21(n).

7. Section 1.62 is amended by revising paragraph (e) and by adding a new paragraph (j) to read as follows:

§ 1.62 File wrapper continuing procedure.

* * * * *

(e) An application filed under this section will utilize the file wrapper and contents of the prior application to constitute the

new continuation, continuation-in-part, or divisional application but will be assigned a new application serial number. Changes to the prior application must be made in the form of an amendment to the prior application as it exists at the time of filing the application under this section. No copy of the prior application or new specification is required. The filing of such a copy or specification will be considered improper, and a filing date as of the date of deposit of the request for an application under this section will not be granted to the application unless a petition with the fee set forth in § 1.17(i)(1) is filed with instructions to cancel the copy or specification.

* * * * *

(j) If any application filed under this section is found to be improper, the applicant will be notified and given a time period within which to correct the filing error in order to obtain a filing date as of the date the filing error is corrected provided the correction is made before the payment of the issue fee, abandonment of, or termination of proceedings on the prior application. If the filing error is not corrected within the time period set, the application will be returned or otherwise disposed of; the fee, if submitted, will be refunded less the handling fee set forth in § 1.21(n).

8. Section 1.96 is amended by revising paragraph (b)(1) to read as follows:

§ 1.96 Submission of computer program listings.

* * * * *

(b) * * *

(1) *Availability of appendix.* Such computer program listings on microfiche will be available to the public for inspection, and microfiche copies thereof will be available for purchase with the file wrapper and contents, after a patent based on such application is granted or the application is otherwise made publicly available.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Notice of Final Rulemaking
Patent and Trademark Automated Search System Fees

The Patent and Trademark Office is amending the rules of practice in patent and trademark cases to establish fees for access to the automated patent and trademark search systems. Public Law 100-703, enacted on November 19, 1988, allows the Commissioner to establish reasonable fees for on-line access to these systems. The effective date of the new fees is February 12, 1990.

The new fees are for the on-line use of APS-Text which is the USPAT data base (full-text of U.S. patents issued after 1974), U.S. classification data from 1790 to the present, and English abstracts of Japanese and Chinese patents (to the extent they are available), and T-Search which is the automated trademark search system. These systems are located in the Patent Search Room and Trademark Search Library, respectively, located in Crystal City, Virginia.

Except for a series of pilot experiments which may occur over the next one or two years, the Office does not plan to provide routine remote on-line access to these data bases at any other facilities at the present time. A separate rulemaking process will be followed when the Office determines to provide such remote on-line access.

The paper and/or microfilm collections of U.S. patents, foreign patent documents and U.S. trademark registrations continue to be available to the public free of charge. The Office reaffirms its commitment to hold a public hearing prior to making any decision concerning the elimination of the paper files.

The Office is setting fees at $40.00 for each hour of APS-Text or T-Search terminal session time, including print time. The fee for each printed page generated from the systems is set at $.10 per page. In the case of the APS-Text, a fee of $25.00 is set for each hour of Office staff assistance to conduct a search. Information on training, reservation of terminal time, payment of fees, and waiver of fee payments under certain circumstances is included in the final rule package.

In response to the notice of proposed rulemaking published in the Federal Register on May 3, 1989 (54 FR 18907), and at a public hearing held on June 30, 1989, the Office received many comments regarding problems encountered by the public in the use of T-Search. The Office believes that T-Search has proven effective for searches performed by Trademark examining attorneys in connection with their examination of applications for the registration of marks. Although the Office is establishing a fee for accessing the T-Search system, the Commissioner is immediately suspending collection of that fee to provide additional time for the public to familiarize themselves with T-Search. The Office will provide the public with sixty days notice before starting to collect the fee.

A copy of the final rule was published in the Federal Register on December 11, 1989 (54 FR 50942).

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of internstional classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
